Yeabsira Tsegaye

My name is Yeabsira Tsegaye. I have always loved to work with code and know I am fulfilling my wish by studying software engineering at Addis Ababa university. I like to travel ,sports and enjoy what life has to offer.

About me

Skills	Hobbies	My Aim in life
• Programming Languages:Python,Java,C++,JavaScript,SQL • Databases:MySQL,PostgreSQL,MongoDB • Version Control:Git	• I like to read fictional books. • Travel to new places, hiking. • Playing some football.	• Get my self to a stable life style. • To be able to contribute to my country. • To have a major impact on the world.

Goals

Short-Term-Goals

- Gain Practical Experience
- Develop Technical Skills
- Obtain Certifications

Long-Term-Goals

- Specialization
- Contribute to Open Source
- Establish a Professional Brand

Educational Background

Skills

Achievement

- Programming Languages:Python,Java,C++,JavaScript,SQL
- Databases:MySQL,PostgreSQL,MongoDB
- Version Control:Git

My Achievements

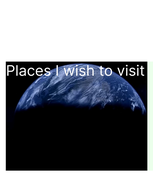
ALX
It is the place where I first started my programming journey. It thought me all the basics that i know today.

A2SV
A2SV was a wonderful experience and an important journey of mine.

Addis software plc
I had a wonderful time and learned so many things while i stayed at addis software plc. It was here that I knew how to apply what I learned

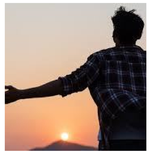
"Your biggest achievements start with small consistent steps. Every effort counts."

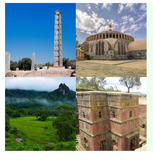
QuoteMant



Travels

I am an out door guy who wants to travel all around the world and see its wonder.





Places I visited

These places are absolutly wonderful and so amazing that I wish I had stayed there longer.

Short Term Goal
The immediate objectives consist of obtaining an internship or junior position, exposing myself to various projects, developing my skills in different programming languages , creating a personal website; obtain certifications ,develop communication, teamwork and problem-solving skills through a project or group work.

Long Term Goal
My long term plan is to achieve promotions to Senior Software Engineer, Technical Lead, or Engineering Manager, set milestones, choose a specialization in software engineering, build a strong professional presence, and network with industry leaders to deepen expertise and stay updated.

Goal Category	Short-Term Goals	Long-Term Goals
Technical Skills	Master a new programming language or framework (e.g., React, Node.js, Python). Learn advanced data structures and algorithms. Gain proficiency in cloud computing platforms (AWS, GCP, Azure).	Become a full-stack developer with expertise in front-end and back-end technologies. Specialize in a particular area of software engineering (e.g., machine learning, cybersecurity, data science). Contribute to cutting-edge research and innovation in the field.
Professional Development	Seek mentorship from experienced software engineers. Actively participate in tech communities and conferences. Obtain relevant certifications (e.g., AWS Certified Developer, Google Cloud Certified Professional).	Advance to a senior software engineering position or technical leadership role. Start your own software company or freelance business. Become a sought-after consultant or trainer in the industry.

Elementary School

My elementary life was in country academy. Its an extraordinary school that had amazing teachers ,curriculum and vision.

High School

I had a successful and fruitful high school career in vision academy.

University

I am currently studying software engineering at Addis Ababa university as a third year and working hard to be a full stack developer.

"Make at least one definite move daily toward your goal."

BRIAN TAY

Short Term Goal
Gain Practical Experience consist of obtaining an internship or junior position, expanding myself to various projects, developing a personal website, obtain certifications ,develop communication, teamwork and problem solving skills through coding in the real world.

Long Term Goal
My long term plan is to achieve promotions to Senior Software Engineer, Lead Engineer, or Technical Architect. Along the milestones, choose a specialization in software engineering, contribute to cutting-edge research and innovation in the field, industry leaders to deepen expertise and stay updated.

Goal Category	Short Term Goals	Long Term Goals
Technical Skills	Master a new programming language or framework (e.g., React, Node.js, Python). Complete a full-stack developer bootcamp or course. Learn cloud platforms (AWS, Azure, or Google Cloud). Contribute to open-source projects. Build a personal portfolio website.	Become a full-stack developer with expertise in front-end and back-end technologies. Specialize in a particular area of software engineering (e.g., AI/ML, cloud computing, cybersecurity). Contribute to cutting-edge research and innovation in the field.
Professional Development	Seek mentorship from experienced software engineers. Actively participate in tech communities and conferences. Network with professionals in the industry. Obtain relevant certifications (e.g., AWS Certified Developer, Google Cloud Certified Professional).	Advance to a senior software engineering position or a technical leadership role. Start your own software company or freelance business. Become a sought after consultant or trainer in the industry.
